

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

WM. STANLEY RAY, STATE PRINTER OF PENNSYLVANIA. 1899.

PREFATORY NOTE.

Originally appointed by Gen. John F. Hartranft, then Governor of Pennsylvania, to edit the Second Series of Pennsylvania Archives, it might be perfectly proper in laying down the work of twenty years, to briefly summarize the work to its close, but the forty-five volumes of its rich and important historical data must suffice. Had the records of the State been under the control of one department, and assistance been rendered to arrange all the documents in chronological order, the task of the Editor would have been lightened, and much of what remains be ready for publication. No appropriation was ever made for the transcribing of papers-and this was paid for by the Editor from the amount received for editing the same. Anxious to preserve for futurity the more valuable of the State Archives-to keep them from the autograph-hunter and despoiler--with a love for the work, have been the principal motives for having this accomplished. As State Librarian, the Editor has suggested that when the new Capitol Building is completed, fire-proof rooms be set apart for the arranging and placing of all documents not required for present purposes in the various departments-these to be under the control of a reliable archivist-where they may be consulted at all times by the historian and genealogist. As they now are, this cannot be done-and much less, owing to the frequent changes of political administration, no one department has any knowledge of the various documents in its care. The Editor would like to see this done. Our Archives are rich in historic lore, and Pennsylvania has not been wholly unmindful of their preservation.

corrections.—Attention is once again called to the fact, that the Editor is not responsible for the orthography of names. The names of the Warrantees are given as found on the records. An important error noticeable is that of "Ex." and "Exs.," indiscriminately employed for "Executors" and "Excess."
